

# AlphaBeta Labs - Sponsor Brief (Public-Safe)

Version: 2026-02-21 · Contact: zgutche@alphabetalabs.ai · Domain: alphabetalabs.ai

## MISSION

AlphaBeta Labs builds governed AI production systems for teams that must ship safely under real-world constraints. We publish outcomes and milestone momentum while protecting implementation IP.

## FLAGSHIP WEDGE

**Kinetic Foundry**: a governed production lane for AI systems with deterministic validation, receipt-backed promotion, and fail-closed controls.

fail-closed gates   replay-required validation   human-approved promotion   minimal public surface

## CURRENT MOMENTUM

### Now

- Kinetic Foundry governance gates operational.
- Sentinel evaluation wired into CI path.
- Canonical milestone publishing via Notes.

### Next

- Expand investor-facing milestone density.
- Publish more public-safe one-page project snapshots.
- Increase sponsor briefing cadence.

## ECOSYSTEM PROGRAMS

Kinetic Foundry · Sentinel Zero · AI Box · Titan · Apex · BC1

Each program reports status through Notes with public-safe milestone entries and next actions.

## WHO WE WORK WITH

- Product teams shipping AI features in production SaaS and tooling.
- Studios and pipeline teams across games and film/video workflows.
- Operators who need governance, observability, and rollback posture.

## **ENGAGEMENT ASK**

For investor, sponsor, and partner conversations, start with /investor and /notes, then request a private build session for fit and scope alignment.

Public-safe disclosure: this brief intentionally excludes source code, private infrastructure details, credentials, and proprietary implementation artifacts.
